Abstract not available for JP11513167T

Abstract of corresponding document: **US5923640**

An optical disc having both rewritable area and read-only area is disclosed. The rewritable area has a single spiral pattern of start track land at a leading edge, and a single spiral pattern of end track land at a trailing edge, whereby portions of the physical address area PID deviated approximately  $P_a/2$  from the track of the rewritable area are being intruded into the start track land and the end track land.
